

EVACUATION

Several types of disasters may force you to be evacuated from your home. If you are told to evacuate, take the following steps:

- Respond Immediately
- Listen carefully to instructions given by local officials. Monitor KSL 1160 AM radio. Evacuate immediately if told to do so.
- Do not call 911 unless there is a life threatening situation.
- If you have time, grab your portable disaster supply kit. Make sure that you include any last minute items, such as prescription medication, that you may need.
- Wear appropriate clothing and sturdy shoes.
- Lock your home.
- Take money with you.
- Use travel routes outlined by local officials. Do not take short cuts; they may be unsafe.

If you go to a shelter, notify staff of any special needs you may have. They will try to accommodate you and make you comfortable.

Be prepared to leave your home if:

- Your area is without electrical power or water for an extended period of time.
- There is a chemical emergency affecting your area.
- Flood water is rising.
- A wildland fire is burning near your home.
- Your home has been severely damaged.
- Local officials tell you to evacuate.
